

In Anderson County, U.S. 29 provides an important connection to 85 and the City of Anderson. As growth continues, the Appalachian Council of Governments (ACOG), in partnership with the South Carolina Department of Transportation, and the Anderson Clemson Area Transportation Study, have turned to exploring mobility options to better serve the community and traveling public. This Corridor Study aims to successfully develop a vision and recommendations for U.S. 29 in Anderson County, from U.S. 178 (E. River Street) to Interstate 85.

-  Currently, U.S. 29 varies between a four-lane divided highway and a rural two-lane farm-to-market road.
-  The majority of the corridor is rural, but the County is seeing both residential and commercial growth.
-  Over the last five years, the total population has jumped by 10,000. Current projections indicate the population will increase by 25,000 by 2035.
-  A total of 963 crashes were reported during a 5.5-year study period - three were pedestrian-related crashes, two of which were fatal.
-  Five other projects that planned by SCDOT along with corridor, which will inform this study.

## Study Timeline
